1. Concept

A. Conceptual Description

The application will be aimed towards a western bar. Ascending this, the application will be comprised of a western styled graphical user interface. The system will contain a home page which includes an image of the bar and the opening times for the bar. The application will include a company page which will consist of a picture of the bar's logo and information pertaining to the bar. The program will also contain a location page which will contain a styled brown map with settings aligned to the right-hand side.

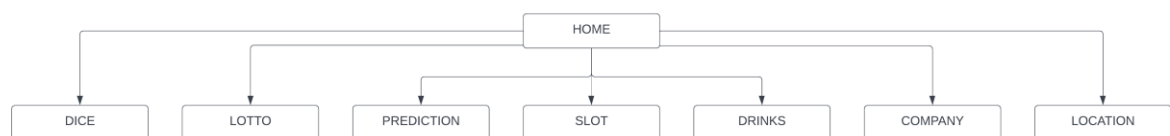

B. Mind Map

The mind map shown below visually represents the core conception for the application.

2. Hierarchical Diagram

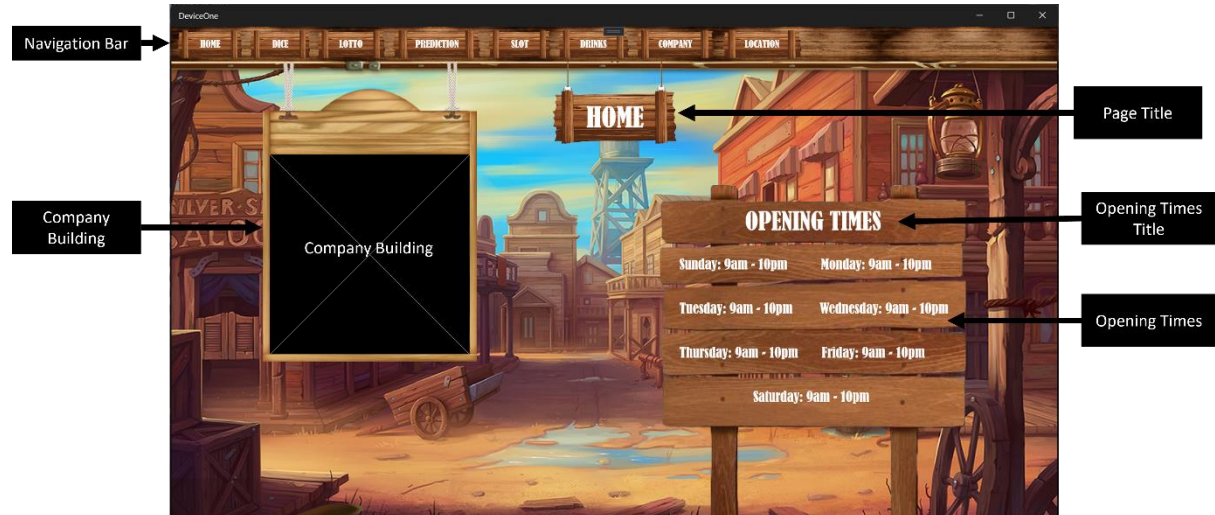

The image shown below displays the application's page connectivity in a simplistic fashion. The image below also reveals key details about the application such as the number of pages and the application's purpose.

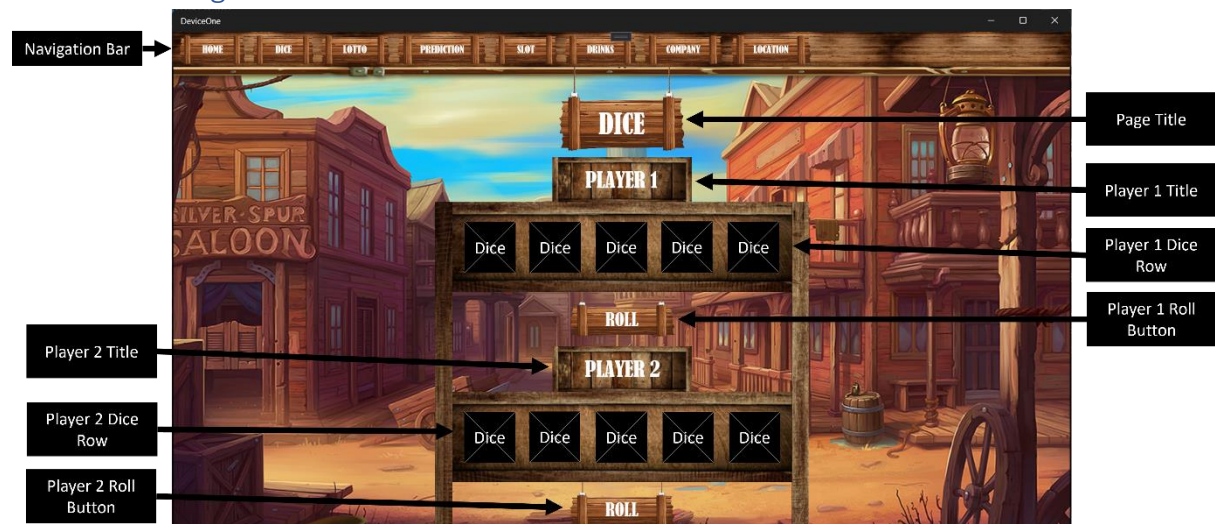

3. Annotated Diagrams

The annotated diagrams shown below establish the functionality of each page located within the application. The annotated diagrams were created for a 1288 x 715 computer monitor.

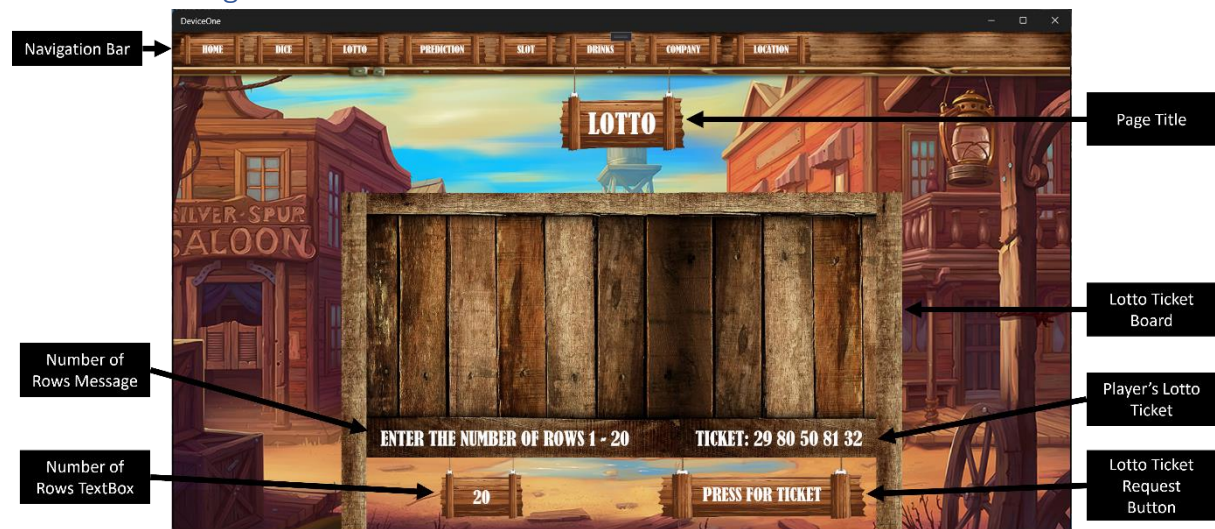

A. Home Page

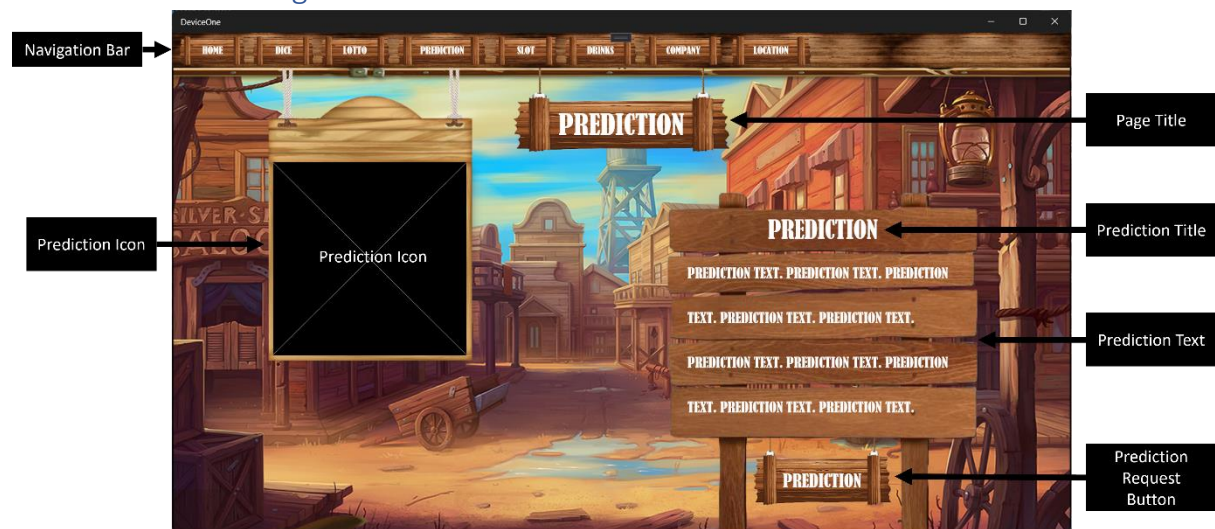

B. Dice Page

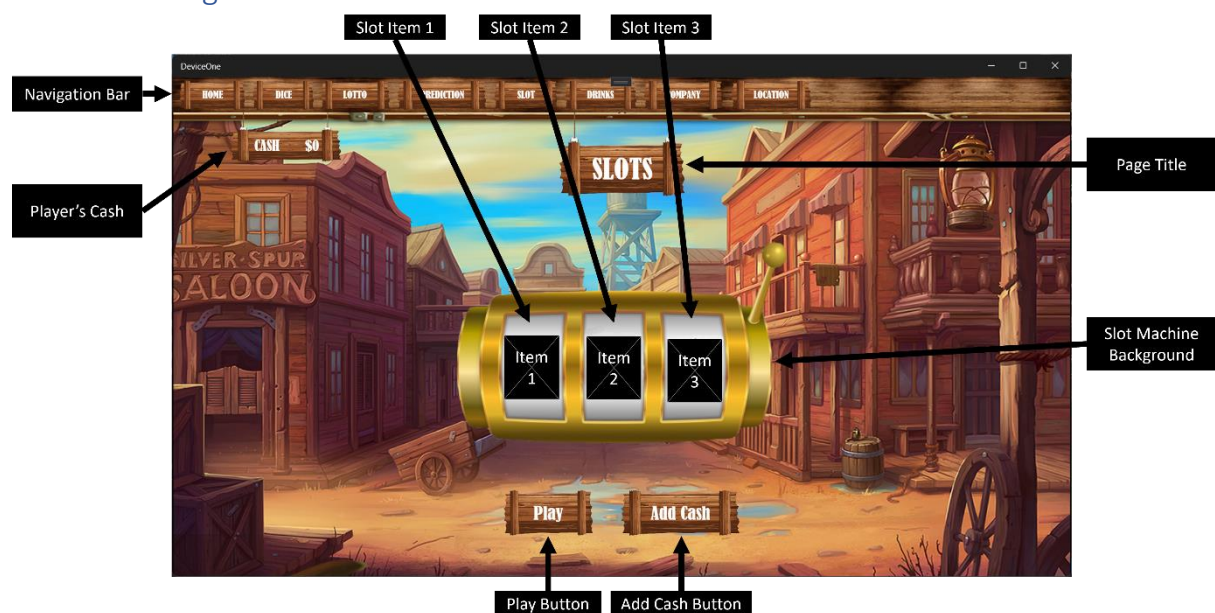

C. Lotto Page

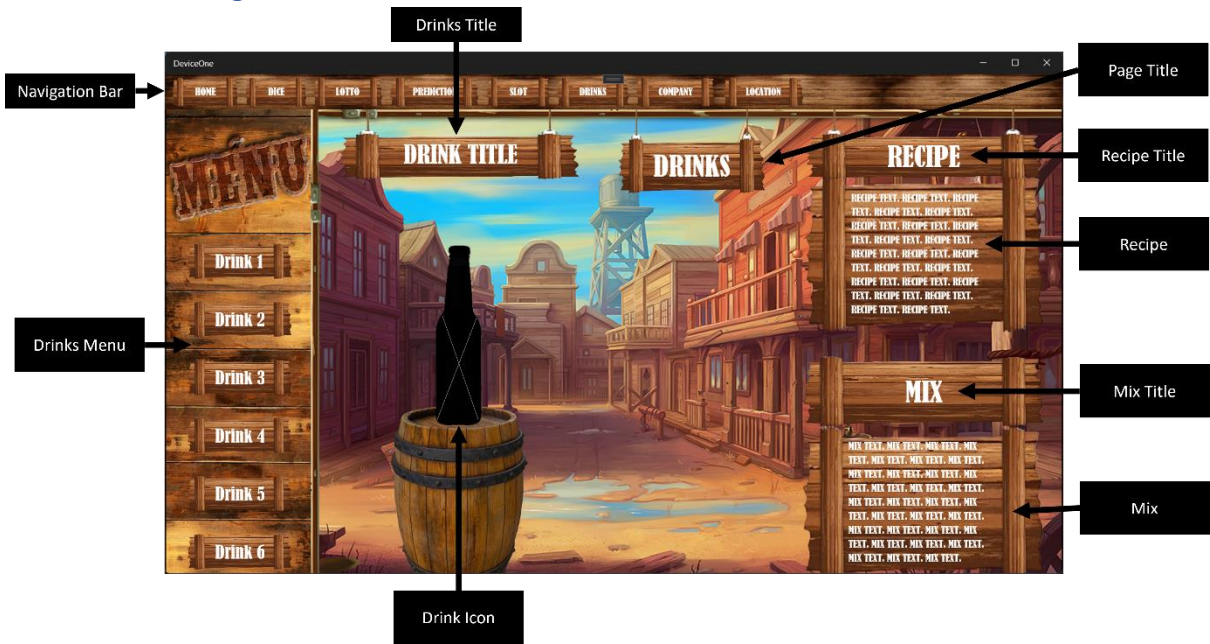

D. Prediction Page

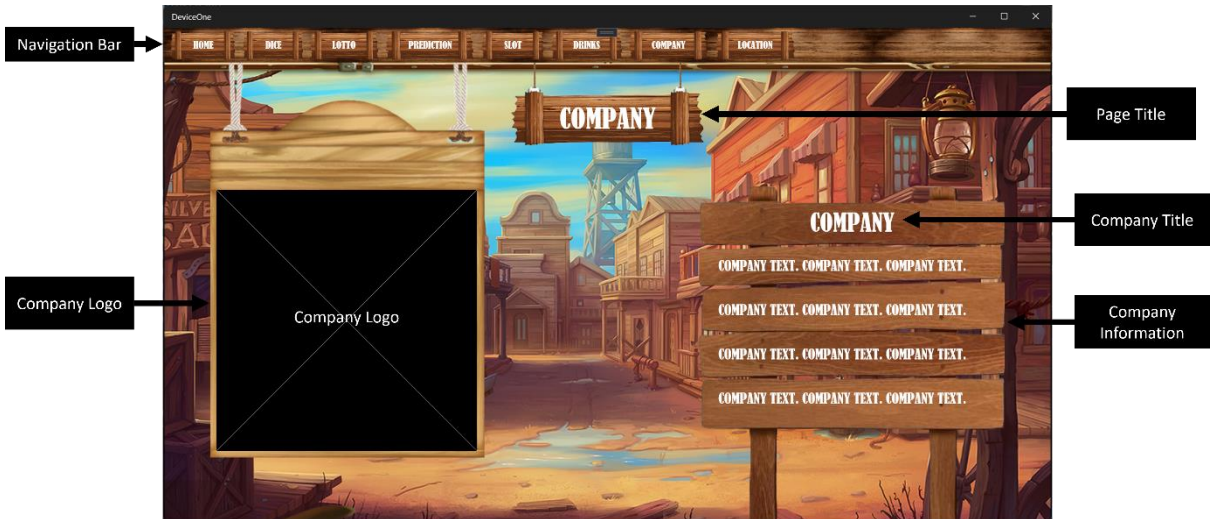

E. Slot Page

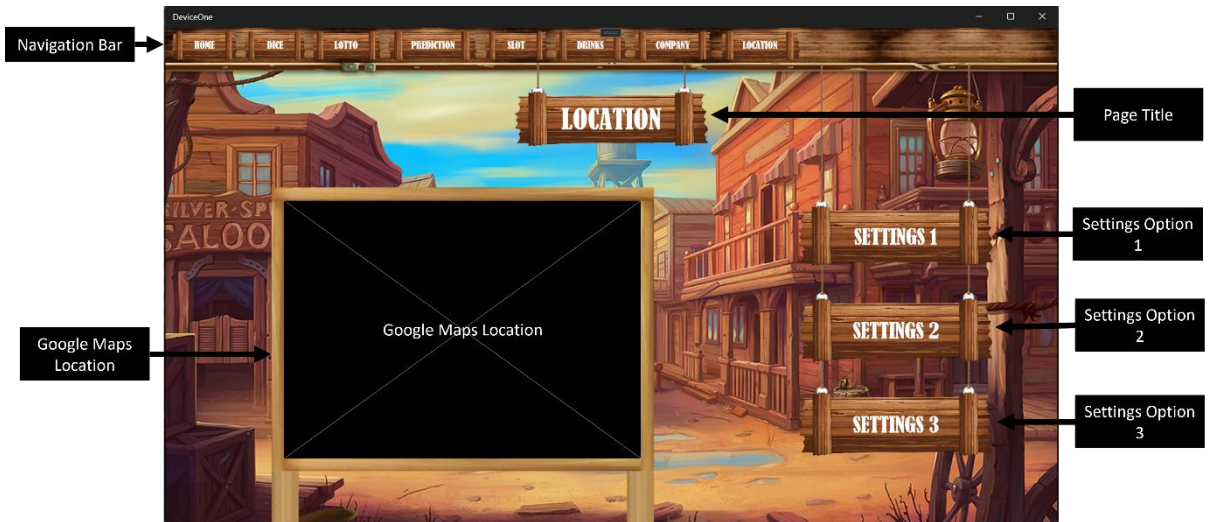

F. Drinks Page

G. Company Page

H. Location Page

4. Mood Board

The mood board shown below is of strict mood board style. I have chosen this mood board style as it was by far the most aesthetically pleasing and it has the advantage of being simplistic for individuals to follow.
